Physician-Assisted Death in Perspective: Assessing the Dutch Experience

This book is the first comprehensive report and analysis of the Dutch euthanasia experience over the last three decades. In contrast to most books about euthanasia, which are written by authors from countries where the practice is illegal and therefore practiced only secretly, this book analyzes empirical data and real-life clinical behavior. Its essays were written by the leading Dutch scholars and clinicians who shaped euthanasia policy and who have studied, evaluated, and helped regulate it. Some of them have themselves practiced euthanasia. The book will contribute to the world literature on physician-assisted death by providing a comprehensive examination of how euthanasia has been practiced and how it has evolved in one specific national and cultural context. It will greatly advance the understanding of euthanasia among both advocates and opponents of the practice.
