The Man Who Mistook His Wife for a Hat and Other Clinical Tales by Oliver Sacks | Summary & Study Guide BookRags

Oliver Sacks is a professor of clinical neurology who has spent years seeing patients. He has compiled some of his more interesting, more personal stories into one volume to share with the world. His goal in writing the book is to present the personal side of neurosis. Often books of this sort are written as a series of case studies full of medical terminology that leaves the average reader frustrated and unwilling to finish the book. Sacks mixes his clinical jargon with a personal empathy for his patients, drawing the reader in and allowing even the most inexperienced reader to gain a better understanding of the lives of the mentally disabled.

This study guide includes the following sections: Plot Summary, Chapter Summaries & Analysis, Characters, Objects/Places, Themes, Style, Quotes, and Topics for Discussion.
