**Learn how to harness the power of light to create gorgeous printed projects and surfaces with photosensitive dyes from Lumi CEO Jesse Genet, creator of Inkodyes!**

Harness the power of light to create gorgeous prints! The newest generation of photosensitive dyes--dyes that activate when exposed to the sun or to ultraviolet light--offers crafters, artists, designers, photographers, and other creative DIYers an easy way to make clean, vivid prints on a variety of surfaces. Developed by two Los Angeles-based designers through their company Lumi, Inkodyes are an innovative and popular line of water-based, photosensitive printing dyes in nine colors that can be used to reproduce art and photographs in full tonal gradations; once fixed, the prints become permanent and can be machine-washed repeatedly without fading. Inkodyes can be used on any absorbent natural fibers, such as cotton, linen, silk, wool, rayon, and natural-blend fabrics, as well as on paper, raw leather, suede, untreated wood, and unglazed ceramics.

Written by Jesse Genet, the creator of Inkodyes, *Print with Light* is an inspiring, step-by-step guide to creating personalized prints and projects. Learn to prepare a printing surface; apply the dyes; create shadow prints, sunfold prints, or photo prints on any absorbent natural fibers and natural-blend fabrics, as well as on paper, raw leather, suede, untreated wood, and unglazed ceramics; and how to use light to develop and fix your prints for lasting color. *Print with Light* also offers 25 beautiful, modern projects for fashion, accessories, jewelry, and home décor, including T-shirts, scarves, and other wearables, purses, bangles, lampshades, pillows, and art for framing, some from inspirational Inkodyers who have taken the process beyond a simple DIY activity.
