The French Revolutionary and Napoleonic Wars were the first truly global conflicts. The Royal Navy was a key player in the wars and the key enabler of British success - at the cessation of hostilities Britain emerged as the only power capable of sustained global hegemony based on maritime and naval strength. The most iconic battles of any era were fought at sea – from the Battle of the Nile in 1798 to Nelson's momentous victory at Trafalgar in October 1805. This book looks at the history of the Royal Navy during the French Revolutionary and Napoleonic Wars from a broad perspective, examining the strategy, operations and tactics of British seapower. While it delves into the details of Royal Navy operations such as battle, blockade, commerce protection and exploration, it also covers a myriad of other aspects often overlooked in narrative histories including the importance of naval logistics, transport, relations with the army and manning. An assessment of key naval figures and combined eyewitness accounts situate the reader firmly in Nelson's navy. Through an exploration of the relationship between the Navy, trade and empire, Martin Robson highlights the contribution the Royal Navy made to Britain's rise to global hegemony through the nineteenth century Pax Britannica.
