Semiconductor Device Modeling with Spice

Paolo Antognetti, Giuseppe Massobrio

Semiconductor Device Modeling with Spice Paolo Antognetti, Giuseppe Massobrio

SPICE (Software Program with Integrated Circuit Emphasis) is a powerful design aid that electronics engineers learn and is the world standard for circuit simulation. And when circuit designers are using the various versions of SPICE to simulate circuits prior to fabrication and accurately predict future performance, this guide could be a useful reference. This revised version explains the ins and outs of SPICE, plus gives new data on modelling advanced devices such as MESFETs, ISFETs, and thyristors. The book should help readers gain maximum value from SPICE, also covering both MOS and FET models. Step by step, it takes the reader through the modelling process, providing complete information on a variety of semiconductor devices for designing specific circuit applications. These include: Pn junction and Schottky diodes; bipolar junction transistor (BJT); junction field effect transistor (JFET); metal oxide semiconductor field effect transistor (MESFET); ion sensitive field effect transistor (ISFET); and semiconductor controlled rectifier (SCR-thyristor). Given the immense and growing acceptance of SPICE, this revision should appeal to the audience of engineers, technicians, and students who use this design program.

From reader reviews:

Phillip Permenter:

Book is to be different for each grade. Book for children until finally adult are different content. As it is known to us that book is very important for us. The book Semiconductor Device Modeling with Spice was making you to know about other knowledge and of course you can take more information. It is rather advantages for you. The book Semiconductor Device Modeling with Spice is not only giving you considerably more new information but also to be your friend when you experience bored. You can spend your current spend time to read your guide. Try to make relationship with the book Semiconductor Device Modeling with Spice. You never really feel lose out for everything in case you read some books.

Logan Merritt:

Reading a reserve can be one of a lot of pastime that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new details. When you read a reserve you will get new information mainly because book is one of a number of ways to share the information or maybe their idea. Second, looking at a book will make you actually more imaginative. When you reading through a book especially fiction book the author will bring someone to imagine the story how the character types do it anything. Third, it is possible to share your knowledge to other folks. When you read this Semiconductor Device Modeling with Spice, you can tells your family, friends in addition to soon about yours guide. Your knowledge can inspire others, make them reading a publication.

Dixie Santiago:

People live in this new time of lifestyle always try and and must have the spare time or they will get great deal of stress from both day to day life and work. So , once we ask do people have time, we will say absolutely indeed. People is human not really a huge robot. Then we question again, what kind of activity are there when the spare time coming to an individual of course your answer can unlimited right. Then ever try this one, reading guides. It can be your alternative throughout spending your spare time, the book you have read is Semiconductor Device Modeling with Spice.

William Evans:

Don't be worry in case you are afraid that this book may filled the space in your house, you will get it in e-book means, more simple and reachable. That Semiconductor Device Modeling with Spice can give you a lot of good friends because by you looking at this one book you have matter that they don't and make an individual more like an interesting person. This specific book can be one of one step for you to get success. This guide offer you information that maybe your friend doesn't know, by knowing more than different make you to be great men and women. So , why hesitate? Let me have Semiconductor Device Modeling with Spice.
