## **New Developments in Categorical Data Analysis for the Social and Behavioral Sciences (Quantitative Methodology Series)**

Categorical data are quantified as either nominal variables--distinguishing different groups, for example, based on socio-economic status, education, and political persuasion--or ordinal variables--distinguishing levels of interest, such as the preferred politician or the preferred type of punishment for committing burglary. This new book is a collection of up-to-date studies on modern categorical data analysis methods, emphasizing their application to relevant and interesting data sets.

This volume concentrates on latent class analysis and item response theory. These methods use latent variables to explain the relationships among observed categorical variables. Latent class analysis yields the classification of a group of respondents according to their pattern of scores on the categorical variables. This provides insight into the mechanisms producing the data and allows the estimation of factor structures and regression models conditional on the latent class structure. Item response theory leads to the identification of one or more ordinal or interval scales. In psychological and educational testing these scales are used for individual measurement of abilities and personality traits.

The focus of this volume is applied. After a method is explained, the potential of the method for analyzing categorical data is illustrated by means of a real data example to show how it can be used effectively for solving a real data problem. These methods are accessible to researchers not trained explicitly in applied statistics. This volume appeals to researchers and advanced students in the social and behavioral sciences, including social, developmental, organizational, clinical and health psychologists, sociologists, educational and marketing researchers, and political scientists. In addition, it is of interest to those who collect data on categorical variables and are faced with the problem of how to analyze such variables--among themselves or in relation to metric variables.

### **From reader reviews:**

#### **Walter Jones:**

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each publication has different aim or even goal; it means that publication has different type. Some people experience enjoy to spend their time and energy to read a book. They are reading whatever they take because their hobby is definitely reading a book. Consider the person who don't like reading a book? Sometime, man feel need book after they found difficult problem as well as exercise. Well, probably you will require this New Developments in Categorical Data Analysis for the Social and Behavioral Sciences (Quantitative Methodology Series).

#### **Jennifer Day:**

The event that you get from New Developments in Categorical Data Analysis for the Social and Behavioral Sciences (Quantitative Methodology Series) is the more deep you looking the information that hide inside the words the more you get considering reading it. It does not mean that this book is hard to comprehend but New Developments in Categorical Data Analysis for the Social and Behavioral Sciences (Quantitative Methodology Series) giving you enjoyment feeling of reading. The copy writer conveys their point in a number of way that can be understood by simply anyone who read the item because the author of this guide is well-known enough. That book also makes your current vocabulary increase well. Therefore it is easy to understand then can go together with you, both in printed or e-book style are available. We highly recommend you for having this kind of New Developments in Categorical Data Analysis for the Social and Behavioral Sciences (Quantitative Methodology Series) instantly.

#### **Billy Salazar:**

Playing with family in a park, coming to see the coastal world or hanging out with close friends is thing that usually you may have done when you have spare time, then why you don't try factor that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love New Developments in Categorical Data Analysis for the Social and Behavioral Sciences (Quantitative Methodology Series), you are able to enjoy both. It is fine combination right, you still would like to miss it? What kind of hang-out type is it? Oh can happen its mind hangout guys. What? Still don't have it, oh come on its named reading friends.

#### **Christopher Melendez:**

Is it an individual who having spare time then spend it whole day by watching television programs or just lying on the bed? Do you need something new? This New Developments in Categorical Data Analysis for the Social and Behavioral Sciences (Quantitative Methodology Series) can be the respond to, oh how comes? The new book you know. You are consequently out of date, spending your extra time by reading in this new era is common not a geek activity. So what these guides have than the others?
